Infinyty CRM: Manual Test Script

Oct 21, 2026 · @R Kishore Reddy

This script takes you through five test leads, from entry to Won or Lost, one click at a time. After every action it tells you what to check on screen and what to check in the database.

Already started testing? If some of these leads already exist, do not add them again. Carry on from the first step you have not done, and use the Check L query to see which stage each lead is in.

Setup

Three browser windows. Open http://localhost:3000 in a normal window and in two private (incognito) windows, so each can be signed in as a different person at the same time.

Window	Sign in as	Email	Role
A	Aayush Mahendru	aayush@infinityanalyticsconsulting.com	CRM Administrator
B	Kishore Reddy R	kishore@infinityanalyticsconsulting.com	CRM Analyst
C	Test Executive (you create it below)	test.executive@infinityanalyticsconsulting.com	CRM Executive

The password is the initial one from setup (see the README).

Create the Executive login (window A).

1. In the left menu click **Team**.
2. Click **Add team member** (top right).
3. Full name: `Test Executive`. Email: `test.executive@infinityanalyticsconsulting.com`. Role: **CRM Executive**. Password: pick one and remember it.
4. Click **Save**.
5. Sign in to window C with it.

Database checks. Open the Neon console, open your project, click **SQL Editor**, make sure the database is `neondb`, paste a query below, and press **Run**. Each query shows every record, so just find the company you are testing. Keep this tab open and re-run after each step.

Check L: the leads table (who owns what, which stage)

```
SELECT l.id, c.name AS company, ct.name AS contact, ct.phone, ct.email,
s.name AS stage,
       l.priority, l.estimated_budget, l.deal_value, src.name AS source,
       cu.full_name AS created_by, au.full_name AS owner, lr.name AS
lost_reason, l.closed_at
FROM leads l
JOIN companies c ON c.id = l.company_id
LEFT JOIN contacts ct ON ct.id = l.primary_contact_id
JOIN pipeline_stages s ON s.id = l.stage_id
LEFT JOIN lead_sources src ON src.id = l.source_id
LEFT JOIN users cu ON cu.id = l.created_by
LEFT JOIN users au ON au.id = l.assigned_to
LEFT JOIN lost_reasons lr ON lr.id = l.lost_reason_id
ORDER BY l.id;
```

Check H: stage history (every move, who did it)

```
SELECT c.name AS company, fs.name AS from_stage, ts.name AS to_stage,
u.full_name AS changed_by, h.note, h.changed_at
FROM lead_stage_history h
JOIN leads l ON l.id = h.lead_id
JOIN companies c ON c.id = l.company_id
LEFT JOIN pipeline_stages fs ON fs.id = h.from_stage
JOIN pipeline_stages ts ON ts.id = h.to_stage
LEFT JOIN users u ON u.id = h.changed_by
ORDER BY h.id;
```

Check A: calls, messages and notes

```
SELECT c.name AS company, t.name AS type, o.name AS outcome, ct.name AS
spoke_to, a.summary, u.full_name AS logged_by
FROM activities a
JOIN leads l ON l.id = a.lead_id
JOIN companies c ON c.id = l.company_id
JOIN activity_types t ON t.id = a.type_id
LEFT JOIN call_outcomes o ON o.id = a.outcome_id
LEFT JOIN contacts ct ON ct.id = a.contact_id
LEFT JOIN users u ON u.id = a.user_id
ORDER BY a.id;
```

Check F: follow-ups

```
SELECT c.name AS company, f.purpose, f.due_at, f.status, u.full_name AS
assigned_to, f.completed_at, f.reminder_sent_at
FROM follow_ups f
JOIN leads l ON l.id = f.lead_id
JOIN companies c ON c.id = l.company_id
LEFT JOIN users u ON u.id = f.assigned_to
ORDER BY f.id;
```

Check C: contact people

```
SELECT c.name AS company, ct.name, ct.job_title, ct.phone, ct.email,
ct.is_primary
FROM contacts ct JOIN companies c ON c.id = ct.company_id
ORDER BY ct.id;
```

Check R: requirements, tech stack and features

```
SELECT c.name AS company, r.status, r.project_type, r.expected_timeline,
r.budget, r.notes,
  (SELECT string_agg(t.name, ', ') FROM requirement_tech_stacks rt JOIN
tech_stacks t ON t.id = rt.tech_stack_id WHERE rt.requirement_id = r.id) AS
tech,
  (SELECT string_agg(f.title || ' (' || f.priority || ')', '; ') FROM
requirement_features f WHERE f.requirement_id = r.id) AS features
FROM requirements r
JOIN leads l ON l.id = r.lead_id
JOIN companies c ON c.id = l.company_id;
```

Check P: prototype rounds and client feedback

```
SELECT c.name AS company, p.round_number, rt.name AS type, rs.name AS status,
p.deadline, p.prototype_link,
       u.full_name AS built_by, p.presented_at,
  (SELECT string_agg(fb.feedback, ' | ') FROM revision_feedback fb WHERE
fb.revision_id = p.id) AS feedback
FROM prototype_revisions p
JOIN leads l ON l.id = p.lead_id
JOIN companies c ON c.id = l.company_id
JOIN revision_types rt ON rt.id = p.type_id
JOIN revision_statuses rs ON rs.id = p.status_id
LEFT JOIN users u ON u.id = p.assigned_to
ORDER BY p.lead_id, p.round_number;
```

Check M: meetings and who was invited

```
SELECT m.id, m.title, m.start_at, m.end_at, m.status, m.series_id, c.name AS
company,
  (SELECT string_agg(a.email, ', ') FROM meeting_attendees a WHERE
a.meeting_id = m.id) AS invited
FROM meetings m
LEFT JOIN leads l ON l.id = m.lead_id
LEFT JOIN companies c ON c.id = l.company_id
ORDER BY m.start_at;
```

Check X: imports, files and users

```
SELECT * FROM import_batches ORDER BY id DESC;
SELECT lead_id, file_name, size_bytes FROM attachments ORDER BY id;
SELECT u.full_name, u.email, r.name AS role, u.is_active FROM users u JOIN
roles r ON r.id = u.role_id ORDER BY u.id;
```

Emails. Handover notices, reminders and meeting invites are not sent for real yet. They print in the black API terminal window. Where a step says "email", look there.

How each step is written. *Do* is what to click and type. *Check on screen* is what you should see. *Check in database* names the query to run and the row you should find. If something differs, note the step number.

Test data sheet

Type these exactly. Each column is one lead; each row is one form field.

Field	Lead 1	Lead 2	Lead 3	Lead 4	Lead 5
Company	Acme Traders	BrightPath Education	GreenLeaf Organics	UrbanNest Realty	Zenith Logistics
Contact person	Rohan Mehta	Sneha Iyer	Vikram Shah	Pooja Nair	Imran Khan
Job title	Owner	Director	Founder	Sales Head	Operations Manager
Phone	+91 98765 43210	+91 99000 22211	+91 98200 11122	+91 98450 33344	+91 97300 55566
Email	rohan@acmetraders.test	sneha@brightpath-edu.test	vikram@greenleaf-organics.test	pooja@urbannest-realty.test	imran@zenith-logistics.test
Source	call	whatsapp	excel	excel	other
Priority	High	High	Medium	High	Low
Estimated budget	150000	250000	300000	450000	80000
Industry	Retail	Education	Food & Beverage	Real Estate	Logistics
Location	Bengaluru	Chennai	Pune	Hyderabad	Mumbai

Field	Lead 1	Lead 2	Lead 3	Lead 4	Lead 5
What do they want built	Online ordering website with payments	Learning app for tutors and students	Online store with subscription boxes	Property listing portal with lead capture	Fleet tracking dashboard
Entered how	By hand, in window C (Executive)	By hand, in window A (Administrator)	CSV file, window A	CSV file, window A	By hand, in window C (Executive)
Test purpose	Every stage to Won	Prototype rounds, reassign	Lost	Follow-ups, meetings	Roles, reassign, delete

Leads 3 and 4 come from the file `test-data/bulk-import-test.csv` in your project folder, so you do not type them.

Phase 1: Entering leads

Step 1.1: add Lead 1 by hand (window C, Executive)

- **Do:** In the left menu click **Add leads**. The **Add one lead** tab is open and has three boxes. Fill them with the Lead 1 column of the data sheet. Box 1, The company: Company name, Industry, Location. Box 2, Who to contact: Contact person, Job title, Phone, Email. Box 3, The opportunity: What do they want built, Where did this lead come from (Source), Priority, Estimated budget. Leave Website empty. Click **Save lead** (bottom right). The button stays grey until the company and a phone or email are filled.
- **Check on screen:** a "Lead added" message, and the page for Acme Traders opens by itself with stage **New**. Click **Leads** in the left menu: Acme Traders is in the table.
- **Check in database:** run **Check L**: one row, company Acme Traders, contact Rohan Mehta, stage new, priority high, budget 150000, source call, created_by Test Executive, owner Test Executive. Run **Check C**: Rohan Mehta is listed for Acme Traders with is_primary true. Run **Check H**: one row for Acme Traders with from_stage empty, to_stage new, note "Lead created", changed_by Test Executive.

Step 1.2: add Lead 5 by hand (window C, Executive)

- **Do:** Click **Add leads** again. Fill the three boxes with the Lead 5 column. Click **Save lead**.
- **Check on screen:** the Zenith Logistics page opens with stage **New**. Click **Leads**: both Acme Traders and Zenith Logistics are in the table.
- **Check in database: Check L** now shows two rows, both created by Test Executive.

Step 1.3: duplicate phone is refused (window C)

- **Do:** Click **Add leads**. Company: `Acme Traders Copy`. Phone: `9876543210` (no +91, no spaces). Leave everything else empty. Click **Save lead**.

- **Check on screen:** a red message "A lead with this phone or email already exists (Acme Traders)" with two links under it: Open the existing lead and Add anyway. Click Open the existing lead and confirm it opens Acme Traders. Do not click Add anyway; no new lead is created.
- **Check in database: Check L** still shows only two rows.

Step 1.4: duplicate email is refused (window C)

- **Do:** Company `Acme Traders Copy 2`, Email `rohan@acmetraders.test`, no phone. Click **Save lead**.
- **Check on screen:** the same duplicate message with the same two links.
- **Check in database:** still two rows in **Check L**.

Step 1.5: a lead without contact details is refused (window C)

- **Do:** Click **Add leads**. Type only `No Contact Co` in Company name. Leave Phone and Email empty.
- **Check on screen:** the **Save lead** and **Save and add another** buttons stay grey, and the text next to them says "Add a company and a phone number or email to save." Type any phone number: the buttons turn active. Clear the phone again and leave the page without saving.
- **Check in database: Check L** still shows two rows.

Step 1.6: add Lead 2 by hand (window A, Administrator)

- **Do:** Click **Add leads**. Fill the three boxes with the Lead 2 column. Because you are an Administrator, box 3 also has an **Owner** list: leave it on **Me**. Click **Save lead**.
- **Check on screen:** the BrightPath Education page opens with stage **New**.
- **Check in database: Check L**: new row, created_by Aayush Mahendru, owner Aayush Mahendru, source whatsapp.

Step 1.7: import Leads 3 and 4 from a file (window A)

- **Do:** Click **Add leads**, then click the **Bulk import** tab. The **Upload a file** card is already selected. Click the large dashed box ("Drop an Excel or CSV file here"), pick `test-data/bulk-import-test.csv` from your project folder, then click **Import leads** (bottom right of the box). The link **Download template** shows the columns the file needs.
- **Check on screen:** a result panel with two boxes: **2 leads imported** and **3 rows skipped**. Under "Why rows were skipped" you see three lines: row 4 already exists as Acme Traders, row 5 company is empty, row 6 needs a phone or an email. Click **View all leads**: GreenLeaf Organics and UrbanNest Realty are there.
- **Check in database: Check L** shows GreenLeaf Organics and UrbanNest Realty (source excel, stage new, created by Aayush Mahendru). **Check X**, first result: one import_batches row with file_name bulk-import-test.csv, total_rows 5, imported_rows

2, skipped_rows 3, and the three reasons in error_details.

Step 1.8: the Leads page (window A)

- **Do:** Click **Leads**. You should see five leads. In the search box ("Find a company, person, phone or email") type `green`, then clear it with the small x. Use the four drop-downs next to it (Stage, Owner, Source, Priority) one at a time, then set each back to "All". Click **Board** (top right of the list) and then **List** again. Press Ctrl+K, type `9845` and look at the result.
- **Check on screen:** each filter narrows the table correctly, Board shows one column per stage, and the Ctrl+K search finds UrbanNest Realty from part of its phone number.

Phase 2: Acme Traders from New to Won

Open a lead by clicking its name in the **Leads** table. On the lead page you see the stage bar across the top, a **Change stage** button (it opens a window whose confirm button is called Move lead), an **Edit** button, and tabs: Activity, Follow-ups, Requirements, Prototype rounds, Meetings, Files, History.

Step 2.1: add a second person (window C, Executive)

- **Do:** Open Acme Traders. In the **People** card click **Add**. Name `Meera Rao`, Job title `Finance Manager`, Phone `+91 98111 22233`, Email `meera@acmetraders.test`. Click **Add**.
- **Check on screen:** Meera appears under Rohan in People.
- **Check in database: Check C**: a second row for Acme Traders, Meera Rao, is_primary false.

Step 2.2: New to Contacted, handover to an Administrator (window C)

- **Do:** On the Acme Traders page click **Change stage** (top right). In the box **New stage** choose `contacted`. In **Note (optional)** type `Intro done, passing to admin`. Click **Move lead**. Before you click, read the blue notice: it says this stage is handled by the CRM Administrator.
- **Check on screen:** the message "Moved to contacted", the stage bar moves one step, and the History tab shows the move with your note.
- **Check in database: Check L**: Acme Traders stage is contacted and the owner changed from Test Executive to an Administrator (Aayush or Aditi, whoever has fewer open leads). **Check H**: a new row new to contacted, changed_by Test Executive, note "Intro done, passing to admin". The API terminal shows a handover email to the new owner.

Step 2.3: first call, no answer, with a follow-up (window A, Administrator)

- **Do:** Open Acme Traders, tab **Activity**. Type: **Call**. Outcome: **No answer**. Spoke to: **Rohan Mehta**. Summary: `Rang twice, no pickup`. Tick **Schedule a follow-up**. When: tomorrow at 11:00. Who follows up: **Me**. Purpose: `Call back Rohan`. Click **Save**.
- **Check on screen:** the call appears in the timeline with the outcome. Open the **Follow-ups** tab: "Call back Rohan" is pending. The "Next follow-up" card at the top shows tomorrow.
- **Check in database: Check A**: Acme Traders, call, no answer, spoke_to Rohan Mehta, logged_by Aayush Mahendru. **Check F**: Call back Rohan, status pending, assigned_to Aayush.

Step 2.4: log each kind of activity (window A)

- **Do:** In **Activity** log three more entries, one at a time, each with Summary then **Save**: Type **WhatsApp**, `Sent the company profile`. Type **Email**, `Sent a short proposal outline`. Type **Note**, `Rohan prefers calls after 4 PM`.
- **Check on screen:** four entries, newest on top. The Outcome box only appears when the type is Call.
- **Check in database: Check A**: four Acme Traders rows with types call, whatsapp, email, note.

Step 2.5: second call, interested (window A)

- **Do:** Log a **Call**, Outcome **Interested**, Spoke to **Rohan Mehta**, Summary `Wants online ordering and UPI payments. Needs a requirements form.` Tick **Schedule a follow-up**, When: two days from now 11:00, Who: **Me**, Purpose `Share requirements form`. **Save**.
- **Check in database: Check F**: two pending follow-ups for Acme Traders.

Step 2.6: complete, move and cancel follow-ups (window A)

- **Do:** Open the **Follow-ups** tab. You see two pending follow-ups. Next to "Call back Rohan" click **Done**. Next to "Share requirements form" click **Move**, pick a time one day later, click **Save**. Now add one more: in the grey box at the top of the tab set **When** to tomorrow, leave **Who** on Me, type `Throwaway` in **Purpose**, and click **Add follow-up**. Then, in the pending list, click **Cancel** on the Throwaway row.
- **Check on screen:** a "Marked done" message. Under **Earlier** you see "Done · Call back Rohan" and "Cancelled · Throwaway". The moved item shows its new time.
- **Check in database: Check F**: Call back Rohan status done with completed_at filled; Throwaway status cancelled; Share requirements form pending with the new due_at.

Step 2.7: Contacted to Qualified (window A)

- **Do: Change stage**, pick `qualified`, Note `Budget and need confirmed`, move.

- **Check in database: Check L**: stage qualified, owner unchanged. **Check H**: new row contacted to qualified.

Step 2.8: Qualified to Prototype, handover to the Analyst (window A)

- **Do: Change stage**, pick `prototype`, move.
- **Check on screen:** the dialog says this stage is handled by the CRM Analyst.
- **Check in database: Check L**: stage prototype, owner **Kishore Reddy R**. The API terminal shows a handover email for Kishore.

Step 2.9: the Analyst can now see the lead (window B)

- **Do:** Sign in as Kishore. Click **Leads**.
- **Check on screen:** Acme Traders is listed (the Analyst only sees leads from Prototype onwards, or ones assigned to them).

Step 2.10: requirements (window B)

- **Do:** Open Acme Traders and click the **Requirements** tab. Status: **Received**. Type of product: **Website / web app**. Client's timeline: `6 weeks`. Client's budget (₹): `150000`. Under Tech stack click **Next.js**, **Django** and **PostgreSQL** so they turn blue. Click **Add feature** three times and fill the rows: `Online ordering` with Must have; `UPI payments` with Must have; `Order history` with Should have. Notes: `Client has logo and brand colours`. Click **Save requirements**.
- **Check on screen:** "Requirements saved". Reload the page and open the tab again: everything is still there. Change Status to **Confirmed with client** and save again.
- **Check in database: Check R**: Acme Traders, status confirmed, project_type web, expected_timeline 6 weeks, budget 150000, tech lists Next.js, Django and PostgreSQL (in any order), features list the three titles with their priorities (must, must, should).

Step 2.11: prototype round 1 (window B)

- **Do:** Open the **Prototype rounds** tab and click **New round**. In **What does the client want in this round?** type `First prototype: home page and ordering flow`. Type: **initial**. Deadline: a date three days from now. Built by: **Kishore Reddy R**. Prototype link: `https://example.com/acme-proto-1`. Click **Add round**.
- **Check on screen:** Round 1 appears with status **Planned**. In the status box at the top right of the round choose **In progress**, then **Presented**. In the box "Add the client's feedback..." type `Likes the layout. Wants a larger Order button.` and click the button beside it.
- **Check in database: Check P**: Acme Traders round 1, type initial, status presented, built_by Kishore Reddy R, presented_at filled, feedback "Likes the layout. Wants a larger Order button."

Step 2.12: upload a file (window B)

- **Do:** Tab **Files**, click **Upload a file**, choose any small image or PDF.
- **Check on screen:** the file is listed. Click **Download** and it opens. Click the trash icon and it disappears; upload it again.
- **Check in database: Check X**, second result: one attachments row for the Acme lead with the file name and size.

Step 2.13: Prototype to Proposal (window B)

- **Do: Change stage**, pick `proposal`, Note `Prototype approved, sending quote`.
- **Check in database: Check L**: stage proposal, owner still Kishore. **Check H**: new row.

Step 2.14: Proposal to Negotiation, handover back to an Administrator (window B)

- **Do: Change stage**, pick `negotiation`.
- **Check in database: Check L**: stage negotiation, owner is an Administrator again. The API terminal shows a handover email.

Step 2.15: Negotiation to Won (window A)

- **Do:** Log a **Call** `Client agreed to 1,40,000 with two milestones`. Then **Change stage**, pick `won`. A box "Final deal value" appears: type `140000`. Note `Signed`. Move.
- **Check on screen:** confetti and "Deal won". The deal value card shows ₹1.4L and the header shows days to close.
- **Check in database: Check L**: stage won, deal_value 140000, closed_at filled. **Check H**: Acme Traders has the full trail new, contacted, qualified, prototype, proposal, negotiation, won, each with who moved it.

Step 2.16: reopen and close again (window A)

- **Do: Change stage**, pick `negotiation`, click **Move lead**. Then **Change stage** again, pick `won`, and click **Move lead**. If the Final deal value box is empty, leave it empty.
- **Check in database: Check L**: after the first move closed_at is empty; after the second it is filled again. deal_value stays 140000 in both. **Check H**: two more rows for Acme Traders.

Phase 3: BrightPath Education, prototype rounds and reassigning

This lead tests the loop where the client keeps asking for changes, and handing a lead from one employee to another.

Step 3.1: first contact (window A, Administrator)

- **Do:** Open BrightPath Education. Tab **Activity**: Type **Call**, Outcome **Answered**, Summary `Wants a learning app for tutors`, **Save**. Click **Change stage**, pick `contacted`, move. Again **Change stage**, pick `qualified`, Note `Budget fits`, move.
- **Check in database: Check A**: one call, answered. **Check H**: new to contacted and contacted to qualified, both by Aayush. **Check L**: stage qualified, owner Aayush (no handover yet).

Step 3.2: hand over to the Analyst (window A)

- **Do: Change stage**, pick `prototype`, move.
- **Check in database: Check L**: stage prototype, owner **Kishore Reddy R**. Handover email in the API terminal.

Step 3.3: requirements (window B, Analyst)

- **Do:** Open BrightPath, tab **Requirements**. Status: **Waiting for client**. Type: **Mobile app**. Timeline `10 weeks`. Budget `250000`. Tech chips **Flutter**, **Django**. **Add feature** three times: `Tutor profiles` (Must have), `Live class booking` (Must have), `Reviews` (Nice to have). **Save requirements**.
- **Check in database: Check R**: BrightPath row with status pending, type mobile, three features.
- **Do next:** click the trash icon beside `Reviews`, **Save requirements**.
- **Check in database: Check R**: features now list only two.

Step 3.4: round 1, initial (window B)

- **Do:** Open the **Prototype rounds** tab, click **New round**. In **What does the client want in this round?** type `First clickable prototype`. Type **initial**. Deadline two days from now. Built by **Kishore Reddy R**. Prototype link `https://example.com/bp-proto-1`. Click **Add round**. In the round's status box choose **Presented**. In "Add the client's feedback..." type `Change the colour scheme to green. Add a parent login.` and click the button beside it. Set the status box to **Changes requested**.
- **Check in database: Check P**: round 1, type initial, status changes requested, built_by Kishore Reddy R, the feedback text present.

Step 3.5: round 2, change request (window B)

- **Do:** Click **New round**. Description box: `Green theme and parent login`. Type **change request**. Deadline three days from now. Prototype link `https://example.com/bp-proto-2`. Click **Add round**. Set the status to **In progress**, then **Presented**. Add the feedback `Good. Needs a payment screen.` Set the status to **Changes requested**.
- **Check on screen:** two rounds, with the newest (round 2) on top, each with its own feedback.
- **Check in database: Check P**: two BrightPath rows, round_number 1 and 2.

Step 3.6: reassign the lead to another employee (window A)

- **Do:** Open BrightPath. Click **Edit** (top right of the lead page). In the **Owner** list choose **Aditi Vad (admin)**. Click **Save**.
- **Check on screen:** the edit window closes and the lead page shows the new owner.
- **Check in database: Check L**: BrightPath owner is Aditi Vad, stage still prototype.
- **Check access (window B):** reload the Leads list as Kishore: BrightPath is still there, because the Analyst sees every lead from the Prototype stage onwards.

Step 3.7: round 3, built by another employee, overdue (window A)

- **Do:** Open BrightPath, tab **Prototype rounds**, click **New round**. Description `Payment screen`. Type **new feature**. Deadline **yesterday**. Built by **Aditi Vad** (the list only has Administrators and the Analyst). Click **Add round**.
- **Check on screen:** the Due badge on the round is red, meaning overdue. Set the status to **In progress**, then **Presented**: the red badge goes away. Add the feedback `Approved.` and set the status to **Approved**.
- **Check in database: Check P**: round 3, type new feature, status approved, built_by Aditi Vad.

Step 3.8: round 4, bug fix (window A)

- **Do:** Click **New round**. Description `Login button misaligned on small phones`. Type **bug fix**. Leave the rest. Click **Add round**.
- **Check in database: Check P**: round 4, bug fix, status planned. You can add as many rounds as the client needs.

Step 3.9: give the lead back to the Analyst (window A)

- **Do: Edit**, Owner **Kishore Reddy R**, save.
- **Check in database: Check L**: owner Kishore Reddy R.

Step 3.10: meeting with an emailed invite (window A, Administrator)

- **Do:** Open BrightPath, tab **Meetings**, click **Schedule meeting**. A window "Schedule a meeting" opens. Meeting name `BrightPath prototype review`. Starts: tomorrow 15:00. Ends: tomorrow 15:45. Meeting link: copy any web address (for example this page's), then click **Paste link**. Under "Who should get the invite?" click **Kishore Reddy R** and **Aditi Vad** so they turn blue (you are not in the list because you are the organiser). In the box below type `sneha@brightpath-edu.test`. Make sure "Email a calendar invite to everyone above" is ticked. Click **Schedule**.
- **Check on screen:** the message "Meeting scheduled" and the meeting in the Meetings tab.

- **Check in database: Check M**: one row, company BrightPath Education, status scheduled, series_id empty, invited lists three emails (Kishore's, Aditi's and sneha@brightpath-edu.test). The API terminal shows an invite email for each address.

Step 3.11: Proposal, Negotiation, Won

- **Do (window B): Change stage** to `proposal`, then to `negotiation` (handover to an Administrator). **Do (window A):** open BrightPath, **Change stage** to `won`, Final deal value `240000`, Note `Signed`.
- **Check in database: Check L**: BrightPath stage won, deal_value 240000. **Check H**: BrightPath shows every move with the right person.

Phase 4: GreenLeaf Organics, losing a lead

Step 4.1: work the lead (window A, Administrator)

- **Do:** Open GreenLeaf Organics from Leads. Check that the page shows company, contact Vikram Shah, phone, email, budget, priority Medium and source excel (these came from the file). Tab **Activity**: Type **Call**, Outcome **Busy**, Summary `Line busy`, **Save**. Then another **Call**, Outcome **Callback requested**, Summary `Asked us to call after the festival`, tick **Schedule a follow-up**, When next week 11:00, Who **Me**, Purpose `Callback after the festival`, **Save**.
- **Check in database: Check A**: two calls for GreenLeaf (busy, callback requested). **Check F**: the pending follow-up "Callback after the festival".

Step 4.2: move forward (window A)

- **Do: Change stage** to `contacted`, then to `qualified`.
- **Check in database: Check H**: two rows for GreenLeaf.

Step 4.3: lose without a reason is refused (window A)

- **Do:** Click **Change stage**. In **New stage** choose `lost`. A box "Why was it lost? *" appears: leave it on "Select a reason…". Click **Move lead**.
- **Check on screen:** a red message in the window says "Pick a reason for losing this lead". The window stays open and the stage does not change.
- **Check in database: Check L**: GreenLeaf is still qualified.

Step 4.4: lose it properly (window A)

- **Do:** In the same window choose the reason **budget too high**, type the note `Wanted a 1.5L site, our quote was 3L`, and click **Move lead**.
- **Check on screen:** the stage shows Lost. The History tab shows the reason and the note.

- **Check in database: Check L**: stage lost, lost_reason "budget too high", closed_at filled. **Check H**: row qualified to lost with the note.

Step 4.5: the open follow-up stays (window A)

- **Do:** Tab **Follow-ups**. The "Callback after the festival" item is still pending, because closing a lead does not cancel it. Click **Cancel** next to it.
- **Check in database: Check F**: that follow-up now has status cancelled.

Step 4.6: board and filters (window A)

- **Do:** Click **Leads**, switch to board view, and filter by stage `lost`.
- **Check on screen:** GreenLeaf sits in the Lost column and is the only lead shown with the filter on.

Phase 5: UrbanNest Realty, follow-ups and meetings

This lead stays open in **Contacted** and is used for reminders, overdue items, the calendar and repeating meetings.

Step 5.1: move to Contacted (window A, Administrator)

- **Do:** Open UrbanNest Realty. **Change stage** to `contacted`. In **Activity** log a **Call**, Outcome **Callback requested**, Summary `Asked for a callback`, **Save**.
- **Check in database: Check L**: stage contacted. **Check A**: the call is logged.

Step 5.2: three follow-ups (window A)

- **Do:** Open the **Follow-ups** tab. In the grey box at the top fill **When**, **Who** and **Purpose**, and click **Add follow-up**, once for each row of this table:

When	Who	Purpose
Yesterday 09:00	Me	Send brochure
Today, 10 minutes from now	Me	Call Pooja
Three days from now 11:00	Aditi Vad	Review the listing portal scope

- **Check on screen:** "Send brochure" is shown in red as overdue. Look at the bell icon in the top bar: it shows a count. Click **Follow-ups** in the left menu: items are grouped as overdue, today and upcoming. Click **Everyone** (top right switch): Aditi's item appears; on **Mine** it does not.
- **Check in database: Check F**: three UrbanNest rows, all pending, assigned_to Aayush, Aayush and Aditi Vad.

Step 5.3: reminder email

- **Do:** Make sure "Call Pooja" is due within 30 minutes (it is). Open a terminal in the `backend` folder and run `python manage.py send_reminders`. It reminds the assignee of every pending follow-up that is overdue or due within 30 minutes and has not been reminded yet.
- **Check on screen:** the terminal prints "Reminders: {'due': 2, 'sent': 2, 'failed': 0}" (the number can be higher if other follow-ups are overdue) and two reminder emails, one for "Send brochure" (marked OVERDUE) and one for "Call Pooja".
- **Check in database: Check F**: reminder_sent_at is filled on those two rows. Run the command a second time: it prints due 0 and sends nothing.

Step 5.4: complete and move (window A)

- **Do:** On the Follow-ups page click **Done** on "Send brochure". On "Review the listing portal scope" click **Move** and choose tomorrow, then **Save**.
- **Check in database: Check F**: Send brochure is done, Review the listing portal scope has the new due_at.

Step 5.5: a single meeting from the calendar (window A)

- **Do:** Click **Calendar** in the left menu. Click the cell of next Tuesday (or click **Schedule meeting** at the top right). In the window: Meeting name `UrbanNest discovery call`. Starts 10:00. Ends 10:30. Related lead **UrbanNest Realty**. Agenda `Understand portal needs`. Under "Who should get the invite?" click **Aditi Vad** and **Kishore Reddy R**, and type `pooja@urbannest-realty.test` in the box below. Make sure "Email a calendar invite" is ticked. Click **Schedule**.
- **Check on screen:** the meeting shows on that day in the calendar and in UrbanNest's **Meetings** tab. The API terminal shows an invite email for each of the three addresses.
- **Check in database: Check M**: one row "UrbanNest discovery call", series_id empty, invited lists three emails.

Step 5.6: a repeating meeting (window A)

- **Do:** In Calendar click **Schedule meeting**. Meeting name `UrbanNest weekly check-in`. Starts next Wednesday 16:00, ends 16:30. Related lead UrbanNest Realty. Tick **Repeat this meeting**. Every how many days: `7`. How many meetings in total: `4`. Leave the invite list empty. Click **Schedule**.
- **Check on screen:** the message "Scheduled 4 meetings" and four meetings on four consecutive Wednesdays at 16:00.
- **Check in database: Check M**: four rows "UrbanNest weekly check-in" with the same series_id, one week apart.

- **Also try:** open the window again, tick Repeat, type `61` in the how-many box and click **Schedule**: it is refused with "A series can have at most 60 meetings".

Step 5.7: open, complete and delete (window A)

- **Do:** Click the first weekly meeting in the calendar. A window opens with the details and the buttons **Delete series**, **Delete** and **Mark done**. Click **Mark done**. Close it, click the second weekly meeting and click **Delete**. Close it, click the third weekly meeting and click **Delete series**.
- **Check in database: Check M**: after Mark done the first weekly row has status done; after Delete the second weekly row is gone; after Delete series every remaining weekly row is gone (the whole series is removed). Only "UrbanNest discovery call" is left.

Step 5.8: calendar navigation (window A)

- **Do:** Use the previous and next month arrows and the **Today** button.
- **Check on screen:** months change; Today returns to this month with today highlighted.

Phase 6: Zenith Logistics, role limits, reassigning and deleting

Do this after Phases 2 to 5. The leads are now: Acme Traders (Won), BrightPath Education (Won), GreenLeaf Organics (Lost), UrbanNest Realty (Contacted), Zenith Logistics (New).

Step 6.1: what the Executive sees (window C)

- **Do:** Click **Leads**. Then, in the browser address bar, type `localhost:3000/dashboard` and press Enter. Do the same with `localhost:3000/team` and `localhost:3000/settings`.
- **Check on screen:** the Leads table shows only Acme Traders and Zenith Logistics, the two leads this person created. The left menu has Follow-ups, Calendar and Add leads but no Dashboard, Team or Settings. Each of the three addresses sends you straight back to Leads.

Step 6.2: what the Analyst sees (window B)

- **Do:** Click **Leads**.
- **Check on screen:** Acme Traders, BrightPath Education and GreenLeaf Organics. UrbanNest (Contacted) and Zenith (New) are not shown, because the Analyst sees leads from Prototype onwards or leads assigned to them. No dashboard, Team or Settings.

Step 6.3: what the Administrator sees (window A)

- **Do:** Click **Leads**.

- **Check on screen:** all five leads. The menu has Dashboard, Team and Settings.

Step 6.4: edit as the Executive (window C)

- **Do:** Open Zenith Logistics and click **Edit**. Change **Estimated budget (₹)** to `90000` and **Priority** to **Medium**. Notice there is no Owner box. Click **Save**.
- **Check on screen:** the lead page shows the new budget and the priority Medium.
- **Check in database: Check L**: Zenith budget 90000.00, priority medium.

Step 6.5: notes and files as the Executive (window C)

- **Do:** On Zenith, tab **Activity**: Type **Note**, Summary `Needs GPS integration`, **Save**. Tab **Files**: **Upload a file**, choose a small image, then click **Download**.
- **Check in database: Check A**: note for Zenith, logged_by Test Executive. **Check X**, second result: a file row for the Zenith lead. There is no delete button for the lead itself.

Step 6.6: reassign to another employee (window A)

- **Do:** Open Zenith Logistics, click **Edit**, and in the **Owner** list choose **Kishore Reddy R (analyst)**. Click **Save**.
- **Check in database: Check L**: Zenith owner Kishore Reddy R, stage still new.
- **Check on screen (window B):** reload Leads: Zenith Logistics now appears for Kishore, because it is assigned to them. **Do (window A):** Edit again, set Owner to **Test Executive (executive)**, Save. Reload window B: Zenith is gone again.

Step 6.7: search respects access (windows B and C)

- **Do:** In window B press Ctrl+K and search `UrbanNest`. In window C press Ctrl+K and search `BrightPath`.
- **Check on screen:** no results in both, because those leads are outside each person's access.

Step 6.8: delete (window A)

- **Do:** If you want Zenith counted on the dashboard, do step 7.1 first. Then open Zenith Logistics and click the red trash icon next to Edit (only Administrators see it). A question asks "Delete Zenith Logistics and everything recorded about it?": confirm.
- **Check on screen:** you return to the Leads list and Zenith is gone in all three windows after a reload.
- **Check in database: Check L**, **Check C**, **Check A** and **Check F**: no Zenith rows. **Check X**, second result: Zenith's file is gone too.

Phase 7: Dashboard, team, settings and profile

Step 7.1: dashboard numbers (window A, before deleting Zenith)

- **Do:** Click **Dashboard**. In the banner at the top click **1 year** (the buttons are 7 days, 30 days, 90 days, 1 year).
- **Check on screen:** compare the eight number cards and the charts with this table.

Where on the dashboard	Expected
Total leads	5
New in 365 days	5
Open pipeline	about ₹5.4L (UrbanNest 450000 + Zenith 90000)
Won in 365 days	₹3.8L (140000 + 240000)
Win rate	66.7% (2 won out of 3 closed)
Avg days to win	close to 0 (both were won the same day)
Overdue follow-ups	the number of pending follow-ups you left overdue
Pipeline by stage	Won 2, Lost 1, Contacted 1, New 1
Where leads come from	call 1, whatsapp 1, excel 2, other 1
Why leads are lost	budget too high: 1

The page also has Team leaderboard (leads added, wins and activities per person), Next follow-ups, Leads added vs deals won, and Recent activity.

- **Check in database:** run `SELECT s.name, count(*) FROM leads l JOIN pipeline_stages s ON s.id = l.stage_id GROUP BY s.name;` and `SELECT sum(deal_value) FROM leads WHERE closed_at IS NOT NULL AND deal_value IS NOT NULL;`. The counts per stage and the sum 380000.00 match the dashboard.
- **After deleting Zenith (step 6.8):** reload the dashboard: Total leads 4, open pipeline about ₹4.5L, and the "other" source disappears.

Step 7.2: team (window A)

- **Do:** Click **Team**. Every member has a card with a small pencil icon. Click the pencil on Test Executive, change **Role** to **CRM Analyst**, click **Save**. In window C reload Leads: Test Executive now also sees the leads from Prototype onwards (Acme Traders, BrightPath, GreenLeaf). Change the role back to **CRM Executive** and save.
- **Do:** Click **Add team member**: Full name `Intern Two`, Email `intern.two@infinityanalyticsconsulting.com`, Role CRM Executive, a Password of at least 8 characters. Save. Open the pencil on Intern Two, untick **Can sign in**, Save.

- **Check in database: Check X**, third result: Intern Two with is_active false, and the roles you set on Test Executive. In a private window try to sign in as Intern Two: it is refused. Tick **Can sign in** again, Save, and sign in: it works.
- **Do:** Open the pencil on Test Executive, type a new password in "New password", Save. Sign out in window C and sign in with the new password: it works, and the old one is refused.
- **Check on screen:** the permissions table further down the Team page matches what you saw in Phase 6.

Step 7.3: settings (window A)

- **Do:** Click **Settings**. On the left pick **Lost reasons**. In the box "Add a new lost reason…" type `client went silent` and click **Add value**.
- **Check in database:** run `SELECT * FROM lost_reasons;` : the new row is there (six rows).
- **Do:** On the new value click the pencil, change the name to `client stopped replying`, and click the green tick.
- **Check in database:** the same query shows the new name.
- **Do:** Look at **budget too high**: it shows a "Used 1" badge and its trash icon is greyed out. Hover it: "Already used, so it can only be renamed".
- **Do:** On `client stopped replying` click the trash icon and confirm the question.
- **Check in database:** the row is gone from `lost_reasons` again.
- **Do:** Pick **Lead sources**, add `referral`. Then open any lead, click **Edit**: the Source list now includes referral. The pipeline stages are not editable here.

Step 7.4: profile (any window)

- **Do:** Click your name card at the bottom of the left menu (or the round avatar at the top right, then Profile). Under Your details: Phone `+91 98000 00000`, click **Save changes**. Change Full name, Save changes, then change it back. The Email box is greyed out (read-only). Under the password section fill Current password, New password and Repeat new password, and click **Change password**. Sign out and sign in with the new password. Also click **Email me a reset link** once.
- **Check on screen:** "Profile updated" and "Password changed" messages; the reset link is printed in the API terminal.
- **Check in database:** run `SELECT full_name, phone FROM users;` to see the new phone and name.

Step 7.5: forgot password (signed out)

- **Do:** On the sign-in page click **Forgot password?**, enter `test.executive@infinityanalyticsconsulting.com`, submit.

- **Check on screen:** a screen titled "Check your inbox". The reset link is printed in the API terminal. Open that link, set a new password, and sign in with it.

Step 7.6: sign-in checks

- **Do:** Enter a wrong password. Turn Caps Lock on while typing the password. Click the eye icon. Then sign in correctly.
- **Check on screen:** the card shakes with an error; a Caps Lock warning appears; the eye shows and hides the password. The Administrator lands on the Dashboard; the Analyst and Executive land on Leads.

Step 7.7: global features

- **Do:** Click the **New** menu in the top bar (quick add lead, meeting, import). Click the bell for overdue follow-ups. Press Ctrl+K for the command palette. Make the browser window narrow like a phone.
- **Check on screen:** each opens correctly, and no page scrolls sideways.

Final checklist

Tick each item when you have seen it on screen and in the database.

- [ ] Leads added by hand as Executive and Administrator (1.1, 1.2, 1.6)
- [ ] Duplicate phone and email warned; lead without contact details refused (1.3 to 1.5)
- [ ] CSV import: 2 imported, 3 skipped, batch recorded (1.7)
- [ ] Second contact person added (2.1)
- [ ] Stage moves recorded in history with who and why (2.2 to 2.16)
- [ ] Handover to Administrator, Analyst and back (2.2, 2.8, 2.14)
- [ ] Call, WhatsApp, Email, Note logged (2.3, 2.4)
- [ ] Follow-up created, done, moved, cancelled (2.3 to 2.6)
- [ ] Requirements with tech stack and features saved and reloaded (2.10, 3.3)
- [ ] Four prototype rounds with status, feedback and overdue marker (3.4 to 3.8)
- [ ] Lead reassigned to another employee and back (3.6, 3.9, 6.6)
- [ ] File uploaded, downloaded, deleted (2.12)
- [ ] Meeting with invites; repeating meeting; mark done, delete one, delete series (3.10, 5.5 to 5.7)
- [ ] Overdue follow-up, bell count, reminder command (5.2, 5.3)
- [ ] Lead won with deal value; lead lost only with a reason (2.15, 3.11, 4.3, 4.4)
- [ ] Executive, Analyst and Administrator each see the right leads and menus (6.1 to 6.3)
- [ ] Administrator can delete; others cannot (6.8)

- [ ] Dashboard figures match (7.1)
- [ ] Team add, role change, deactivate, password reset (7.2)
- [ ] Settings add, rename, delete; used value protected (7.3)
- [ ] Profile, change password, forgot password, sign-in errors (7.4 to 7.6)

If a step fails, write down the step number, what you did, what you expected, what you saw, and copy any red message or API terminal error. Send those to me and I will find and fix it.
